World Congress for the Advancement of Surgery

20-21.10.2015 • Hilton, Tel Aviv

Joel Goldberg

My clinical experience has made apparent a number of questions in the epidemiology and surgical management of late stage colorectal cancer and advanced gynecologic malignancies.

As a result, I have pursued and completed my Master's in Public Health at HSPH, with a research focus on epidemiology, outcomes, and predictive modeling in colorectal and gynecologic malignancies. In particular, my research interests focus on assessing the effects of late surgical intervention on morbidity, mortality, and quality of life in patients with advanced malignancies, and on predictive modeling to assess the most suitable candidates for such interventions.
